

Umweltbeobachtungskonferenz 2004

Air Pollution Effects on Health

Jürgen Schneider, Abt. für Lufthygiene

Chairperson EMEP Steering Body

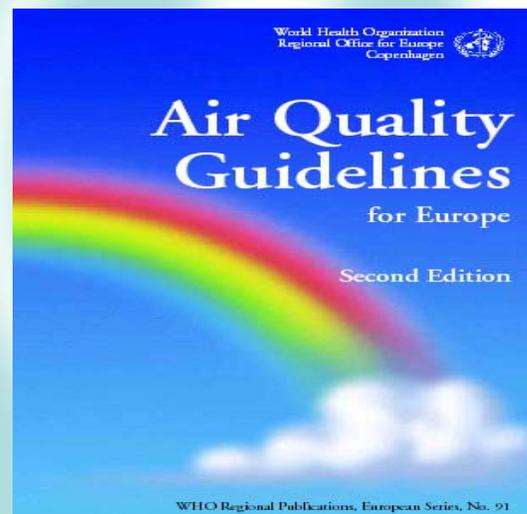

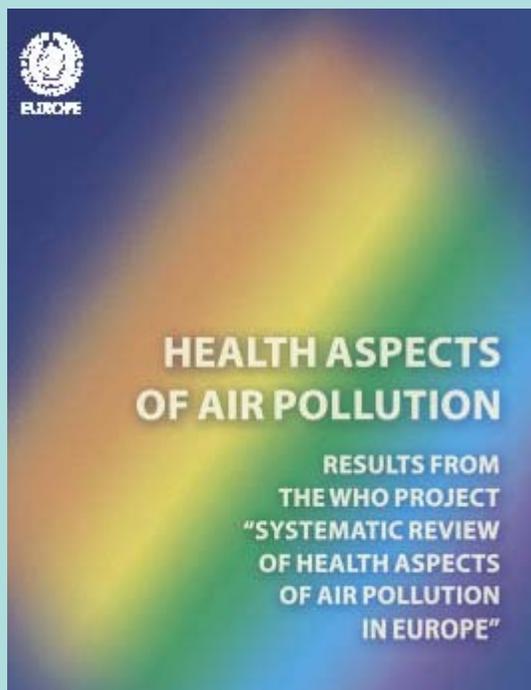

Project Manager at WHO (2002-2004)

Ziel: Identifizierung und Quantifizierung von Effekten von Luftschadstoffen auf die Gesundheit, als Basis für weitere Maßnahmen

Steps of a risk assessment

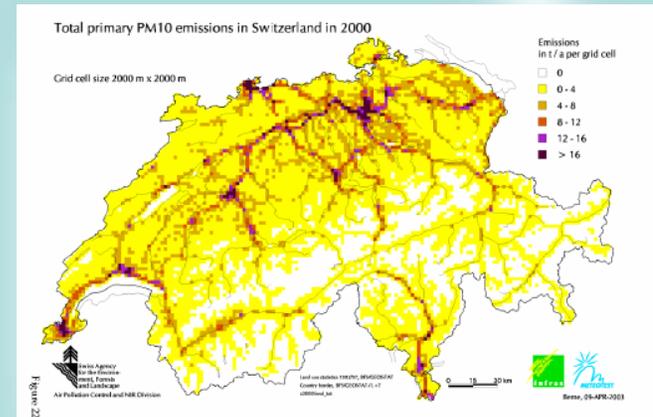

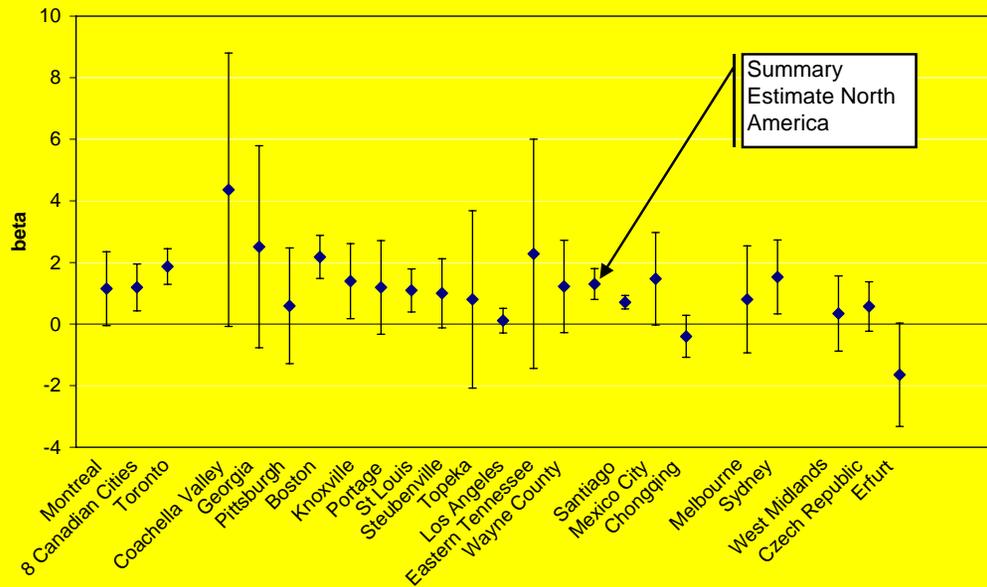

- Hazard identification: WHO
- Development of dose-response function: WHO
- Exposure assessment: EMEP; City delta; Jedermann
- Risk characterisation WHO, EMEP, IIASA

Hazard identification

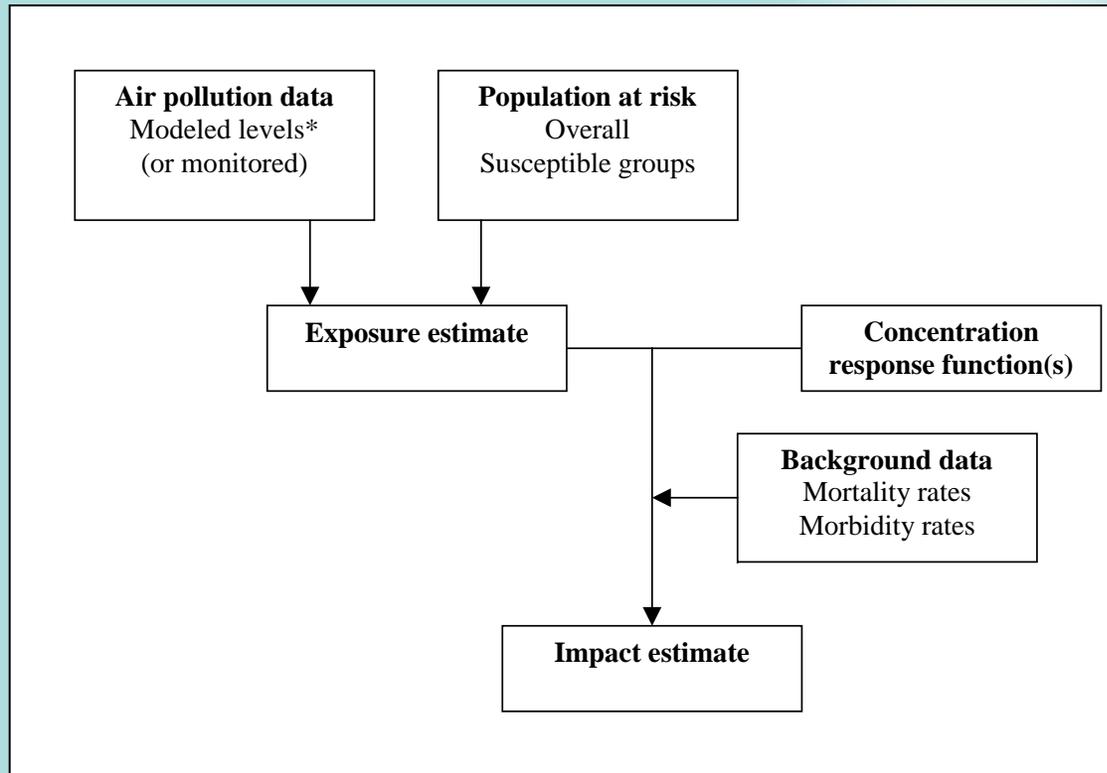

Development of CR function

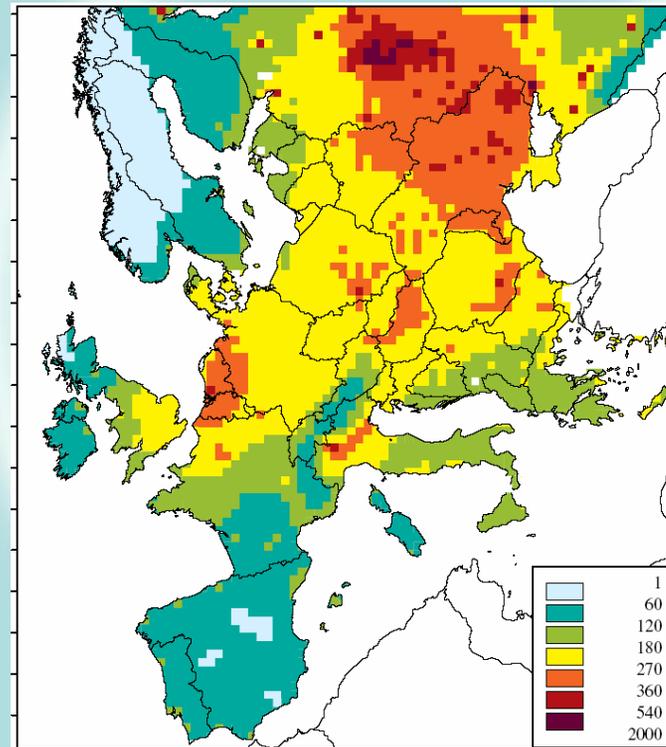

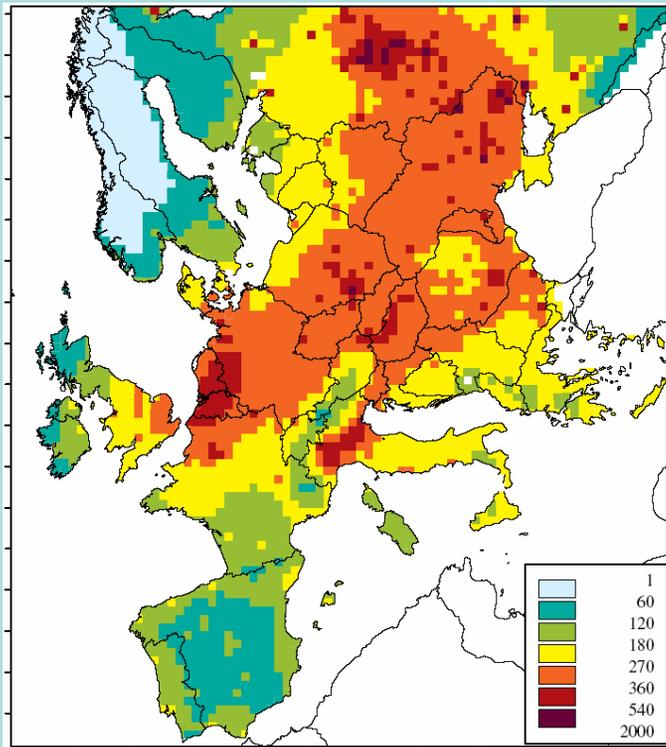

Exposure assessment

Structural indicator for exposure assessment

Risk estimate: reduction of life expectancy due to exposure to fine PM

30.09.2004 | Folie 9

Defizite:

Health effects studies (European)

DGEnv versus DGRes

Health related AQ Monitoring -> Exposure

Health base rates (in particular morbidity)

Stärken:

Gut dokumentierte Effekte

Transparenz, stakeholder involvement

Definierte Verantwortlichkeiten

Internationale Institutionen, die zwischen Wissenschaft und policy development angesiedelt sind
